 **TEKsystems**
Own change

Per Scholas prepares learners for tech careers through no-cost technology skills training and access to employer networks. **Over 17,000 graduates have launched successful careers in tech to date at more than 500 companies.**

Take your skills to the next level. Become efficient in Agile-Scrum project methodologies using Jira, one of the most influential software tools in the market, excel at programming and understanding program flow, basic I/O, Concurrency, JDBC, Java networking and Java 8, and deliver high quality web applications by learning how to wire, create, manage, test and inspect Java programs and projects to deliver quality web-based applications.

After 14 weeks, you'll be equipped with the experience to fulfill a wide variety of entry and mid-level positions such as:

- Full Stack Developer
- Software Engineer
- Java Developer
